Business Analyst and Automation Consultant with 4+ years turning data into decisions for international teams across the US, Canada and Europe. Dual background in Mechanical Engineering and Analytics for Business. Currently leading BI + Power Platform delivery at CQ Fluency (US), consulting on GenAI + MCPs for Wings4U's Customer Advocacy Intelligence (Czech Republic), and teaching a Power BI bootcamp at USMP (100+ students). Pursuing an MSc in Business Analytics at Pontificia Universidad Católica de Chile — ranked #1 in Latin America. Open to senior / lead roles.

Experience

Automation Analyst · Consultant

Wings4U

2026 — Present

Prague, Czech Republic (remote)

- Consulting for a global B2B Customer Marketing & Advocacy agency serving enterprise tech clients.
- Designing low-code solutions and building custom **MCPs (Model Context Protocols)** to power the Customer Advocacy Intelligence stack.
- Packaging AI-driven insights that Wings4U resells to enterprise clients — from advocacy data to revenue-ready deliverables.
- Cross-functional work with product, sales and delivery teams to define scope and measure impact.

Business Analyst

CQ Fluency

2023 — Present

New Jersey, USA (remote)

- Own Power BI dashboards and Power Platform automations for multiple internal teams and Project Managers.
- Python automations (Pandas, MySQL, NumPy) supporting operations reporting and data quality workflows.
- Power Automate flows for project hours notifications and comparison vs. projected hours — reducing manual tracking overhead.
- Requirements discovery with stakeholders, translating business needs into structured data requirements.

Instructor · Power BI Bootcamp

Universidad San Martín de Porres (USMP)

2026 — Present

Lima, Perú

- Lead instructor of the Power BI bootcamp: end-to-end curriculum (data modeling, DAX, storytelling, dashboards) for **100+ students**.
- Mentoring on real business cases; preparing students to deliver executive-ready reports.

Business Intelligence Engineer

Valia

2022 — 2023

Delaware, USA (remote)

- **60+ visualization reports** in Looker Studio for internal and client-facing dashboards.
- Complex PostgreSQL queries and AWS → BigQuery data transformations at scale.
- Contributed to LLM integrations (Valia's Copilot) and connected HubSpot + Google Analytics APIs for marketing reporting.

Product Analyst

Ove Decors

2021 — 2022

Montreal, Canada (remote)

- Power BI dashboards connected to MySQL feeding cross-team decisions.
- Invoice OCR automation with Power Automate + AI Builder — **–95% manual processing time**.
- Advanced Excel analytics and web scraping projects (Amazon, Overstock) for competitive intelligence.

Education

MSc · Business Analytics

Pontificia Universidad Católica de Chile

2026 — Present · Santiago, Chile

#1 in LATAM for Business Analytics

Graduate Certificate · Analytics for Business Decision Making

Mohawk College
